

INDIA TRADE OVERSEAS

NASHIK ONION VERTICAL

Final Detailed Project Report, Website Blueprint and
Sales-Conversion System

Domestic India | International Export | Bulk B2B Trade

Prepared for India Trade Overseas

Founder & Proprietor: Md Ramiz Raza Khan

Where Quality Meets Global Demand

www.indiatradeoverseas.com

DOCUMENT CONTROL

Purpose, Scope and Approval Status

This DPR is the implementation-ready blueprint for the Nashik Onion vertical of India Trade Overseas. It combines business positioning, product architecture, domestic and export workflows, website copy, conversion design, CRM rules, analytics, compliance and launch acceptance criteria.

Field	Approved Direction
Business vertical	Nashik Onion
Audience	Domestic bulk buyers and verified international importers
Primary objective	Generate complete, commercially usable B2B enquiries
Brand style	Minimalist, cinematic, premium and trustworthy
Primary channel	Website RFQ, WhatsApp, telephone and CRM follow-up
Official spelling	Nashik Onion
Brand owner	India Trade Overseas
Founder	Md Ramiz Raza Khan

CONTENTS

01 Executive direction and commercial objectives
02 Market, customer and value proposition
03 Product, crop, size, grade and packaging specifications
04 Domestic supply and international export operating models
05 Quality, storage, logistics and documentation controls
06 Minimalist cinematic design system and colour palette
07 Complete conversion-led website content
08 RFQ, lead qualification, CRM and automation
09 SEO, analytics, performance, security and accessibility
10 Compliance, implementation, launch criteria and KPIs

PART I - BUSINESS STRATEGY

Executive Summary

India Trade Overseas will develop a dedicated Nashik Onion vertical as a complete B2B sales and lead-qualification system. The page will support domestic truckload supply and international container-based export enquiries while presenting transparent product specifications and operational responsibilities.

The Five-Second Message

India Trade Overseas supplies specification-based Nashik red onions to domestic and international B2B buyers with grading, packaging, inspection, documentation and logistics coordination.

Project vision

To establish India Trade Overseas as a trusted and professionally managed B2B sourcing partner for Nashik onions in domestic and international markets.

Mission

- Source suitable onion lots from Nashik and approved nearby producing regions.
- Supply against buyer-confirmed size, grade, quality tolerance and packaging.
- Coordinate sorting, grading, packing, inspection, storage and dispatch.
- Provide transparent quotations, documentation and shipment updates.
- Separate commercially ready buyers from incomplete rate enquiries.
- Create a measurable lead-to-order system connected with the company CRM.
- Develop trial orders into structured recurring domestic and export supply relationships.

Primary business objectives

Objective	Desired Outcome
Qualified enquiries	Capture quantity, grade, size, packaging, destination and timeline before quotation.
Sales conversion	Move verified buyers from RFQ to quotation, purchase order and repeat supply.
Buyer trust	Show real processes, applicable documents and verified operational evidence.
Operational clarity	Define responsibilities and commercial inclusions before procurement.
Measurement	Track advertisement, landing page, enquiry, quotation and order outcomes.

PART II - MARKET

Target Customers and Buyer Intent

The page must split domestic and international visitors immediately because their buying questions, commercial terms, documentation and logistics are materially different.

Domestic buyer segments

- Onion wholesalers, mandi traders, commission agents and vegetable distributors.
- Retail-chain and supermarket procurement companies.
- Hotels, restaurants, caterers and institutional procurement companies.
- Food processors, dehydrated onion manufacturers and pickle or seasoning units.
- Exporters requiring Nashik-origin stock and buyers requiring recurring truckloads.

International buyer segments

- Licensed onion importers and overseas wholesalers.
- Fresh-produce, supermarket and food-service distributors.
- Vegetable-processing and private-label packing companies.
- Re-exporters and qualified container-based buyers.

Priority market direction

Potential markets may include Sri Lanka, Bangladesh, Nepal, Bhutan, the United Arab Emirates, Oman, Qatar, Bahrain, Kuwait, Saudi Arabia, Maldives, Malaysia, Singapore, Vietnam and Mauritius. Every transaction remains subject to current Indian export policy, destination-country rules, banking compliance and logistics feasibility.

Buyer personas and calls to action

Buyer	Primary Need	Conversion CTA
Domestic wholesaler	Fast truckload supply and delivered pricing	Get Domestic Delivered Rate
Food processor	Recurring volume and agreed tolerance	Discuss Monthly Supply
International importer	Container supply, documents and execution	Request Export SCO
Supermarket distributor	Consistent grading and presentation	Request Premium Packing Offer
Trial buyer	Execution confidence before a contract	Plan a Trial Order

PART III - PRODUCT ARCHITECTURE

Nashik Red Onion Portfolio

Fresh red onions will be sourced from Nashik and approved nearby producing regions of Maharashtra. Each commercial offer must identify the crop, lot, grade, size, packaging and destination requirements.

Seasonal crop categories

Kharif Onion

Supply is subject to checking maturity, skin, moisture, firmness and suitability for the proposed transit.

Late Kharif Onion

Available according to seasonal arrivals and buyer-approved quality requirements.

Rabi or Summer Onion

Suitable lots may support longer storage and distribution cycles when curing and condition are appropriate.

Size classification

Category	Indicative Diameter	Typical Application
Small	25-35 mm	Processing and selected institutional markets
Medium	35-45 mm	General wholesale and consumption
Large	45-55 mm	Premium wholesale and common export requirements
Extra Large	55 mm and above	Buyer-specific premium markets
Mixed Grade	Buyer-defined ratio	General trading or price-sensitive requirements

Commercial references may also be displayed as 25 mm+, 35 mm+, 40 mm+, 45 mm+, 50 mm+ and 55 mm+. Final tolerance and mixed-size percentage must be written into the commercial document.

Quality grades

Grade	Positioning	Control Level
Commercial	Price-sensitive domestic or approved bulk requirements	Standard sorting; buyer-agreed visible-defect and mixed-size tolerance
Standard Export	International wholesale distribution	Mature bulbs, suitable curing, buyer-approved size, export packing and controlled defects
Premium Export	Premium wholesale and retail channels	Tighter size, appearance and visible-defect control with enhanced sorting

PART III - SPECIFICATIONS

Master Product Specification

Every quotation or order must confirm the following fields. Website content is indicative; the signed commercial document is authoritative.

Parameter	Required Confirmation
Product	Nashik Red Onion
Origin	Nashik or approved nearby producing region, Maharashtra, India
Crop	Kharif, Late Kharif or Rabi
Grade	Commercial, Standard Export or Premium Export
Size	25+, 35+, 40+, 45+, 50+, 55+ mm or customized
Colour	Red or pink-red, subject to crop and approved lot
Condition	Fresh, mature and commercially sound
Skin and neck	Buyer-approved outer skin and dryness
Defect tolerance	Written tolerance for sprouting, decay, cuts, doubles and damage
Foreign matter	Within mutually agreed tolerance
Packing	Mesh, jute, private-label or customized
Quantity	Metric tons, truckload or container load
Inspection	Internal, buyer representative or approved third party
Trade term	Ex-Warehouse, FOR, FCA, FOB, CFR, CIF or agreed structure
Payment	As stated in accepted commercial documents
Dispatch	Subject to procurement, payment, logistics and regulatory confirmation

Mandatory quality rule

The website must never claim zero defects or guarantee a universal shelf life. Crop performance depends on season, curing, weather, handling, storage, temperature, humidity and transit conditions.

PART III - PACKAGING

Domestic and International Packaging

Packaging must protect ventilation, maintain presentation and match the buyer's distribution model. Final net weight, bag tolerance, artwork and shipping marks must be confirmed before production.

Market	Standard Options	Customization
Domestic	20 KG, 25 KG, 40 KG and 50 KG mesh or jute bags	Buyer-branded bags and institutional pack sizes
International	5 KG, 8 KG, 9 KG, 10 KG, 20 KG and 25 KG ventilated mesh bags	Private label, product labels, barcodes and destination shipping marks

Packaging control checklist

- Correct net-weight target and written weight tolerance.
- Adequate ventilation and appropriate bag strength.
- Secure closure or stitching and accurate bag count.
- Product, lot and country-of-origin identification where required.
- Buyer-approved artwork before printing private-label material.
- Destination-specific markings verified before dispatch.

Product disclaimer

Colour, skin, firmness, pungency, moisture, shelf life and storage performance vary by crop, season, weather, producing area, curing, storage and individual lot. Final supply is governed by the written specification.

PART IV - DOMESTIC TRADE

Domestic Supply Operating Model

Domestic orders can be offered under an Ex-Warehouse, FOR or delivered-to-destination structure, or through a recurring weekly or monthly supply programme.

Domestic workflow

- Receive and verify the buyer's company details and requirement.
- Confirm size, grade, tolerance, packaging, quantity and destination.
- Check suitable lots and share applicable photographs, video or inspection information.
- Issue a formal quotation or Proforma Invoice with validity and exclusions.
- Secure written acceptance and agreed payment terms.
- Complete procurement, grading, packing and vehicle coordination.
- Issue dispatch documents, track transit and collect delivery acknowledgement.
- Schedule the next requirement for recurring buyers.

Required domestic quotation breakdown

Cost Component	Quotation Requirement
Material	Base onion rate against grade and size
Processing	Sorting, grading and labour
Packing	Bag type, weight and printing
Handling	Warehouse and loading, where applicable
Transport	Vehicle, route and destination freight
Tax and insurance	Applicable taxes and optional insurance
Commercial total	Total basis, validity and dispatch window

PART IV - INTERNATIONAL TRADE

Export Operating Model

Export quotations may be structured under EXW, FCA, FOB, CFR or CIF, subject to destination feasibility and mutual agreement. The named place or port, included costs, risk point, document responsibility and applicable Incoterms version must be stated.

Export workflow

Stage	Control
1. RFQ	Capture importer identity, destination, specification, quantity, timeline and payment instrument.
2. Feasibility	Review crop, destination rules, documentation, logistics and commercial viability.
3. Offer	Issue quotation or SCO; receive Purchase Order; issue Proforma Invoice.
4. Security	Complete payment security and written commercial confirmation before procurement.
5. Preparation	Procure, sort, grade, pack and inspect the approved product.
6. Shipment	Coordinate container, vessel, customs, loading, seal and documents.
7. Follow-up	Share shipment updates, record arrival feedback and schedule repeat supply.

Export documentation

- Commercial Invoice and Packing List.
- Shipping Bill and Bill of Lading.
- Certificate of Origin and Phytosanitary Certificate.
- Fumigation, inspection, weight or quality certificate where applicable and agreed.
- Insurance Certificate for applicable CIF transactions.
- Container, seal and loading records.
- Other documents required by the destination and contract.

No document should be promised unless it is applicable, obtainable, contractually included and compatible with the destination-country requirement.

PART V - OPERATIONS

Quality Assurance, Storage and Logistics

The operating system must protect the buyer-approved specification at each handoff - lot selection, grading, packing, loading, transport and documentation.

Five-stage quality protocol

Stage	Checks
Supplier and lot	Identity, origin, crop, availability, preliminary size, quality and transit suitability
Pre-packing	Colour, firmness, skin, neck, size, sprouting, decay, cuts, doubles and foreign matter
Sorting and packing	Removal of unsuitable bulbs, size segregation, weight, count, labels and packing strength
Pre-dispatch	Quantity, bag count, vehicle or container condition, ventilation, loading and seal
Independent inspection	Buyer representative or approved third party when mutually agreed

Storage and handling

- Use dry, clean and ventilated storage protected from rain and standing water.
- Avoid excessive stacking pressure and unnecessary handling.
- Separate wet, damaged or decayed bulbs and monitor stock condition.
- Apply first-in, first-out movement and plan dispatch against crop condition.
- Assess storage suitability against curing, humidity, temperature and expected holding period.

Logistics controls

- Domestic: truck selection, freight, route, loading point, driver details, tracking and proof of delivery.
- Export: container availability and condition, vessel cutoff, customs, loading pattern, seal, Bill of Lading and arrival updates.
- Do not guarantee a fixed payload before confirming bag size, product density, container type, legal payload and carrier rules.

PART VI - VISUAL IDENTITY

Minimalist Cinematic Colour Palette

The design should feel premium, earthy and internationally credible. Colour is used with restraint: ivory provides breathing room, burgundy carries the brand, olive signals agriculture, charcoal anchors legibility and gold highlights trust.

Colour	HEX	Use
Deep Burgundy	#4A101C	Hero background, major section bands, premium brand moments
Nashik Onion Red	#7A2332	Primary CTA, active states, key numbers and product accents
Harvest Wine	#8E3347	Subtle gradients, hover states and secondary highlights
Muted Olive	#566044	Agriculture, quality markers and process indicators
Warm Ivory	#F7F3EA	Main background and cinematic negative space
Natural Sand	#DED1BC	Dividers, cards, tables and packaging references
Soft Gold	#B5965A	Trust accents, fine rules and premium micro-details
Charcoal	#22211F	Headlines, body text and footer contrast

Recommended colour ratio

Share	Colour Role	Purpose
60%	Warm Ivory	Open background and premium negative space
20%	Burgundy and Onion Red	Brand authority, hero and conversion
10%	Charcoal	Readable hierarchy and body text
7%	Muted Olive and Sand	Agriculture, cards and visual balance
3%	Soft Gold	Restrained premium accents only

PART VI - DESIGN RULES

Cinematic Application Guidelines

Hero treatment

- Use one wide, high-quality visual of real red onions, a Nashik field, grading or loading activity.
- Apply a deep burgundy-to-transparent overlay to protect headline readability.
- Keep the headline within two lines on desktop and three lines on mobile.
- Use one primary red CTA and one quiet outlined secondary CTA.
- Avoid crowded collages, oversized certificates and artificial product imagery.

Section system

Component	Visual Rule
Page background	Warm Ivory; alternate with white or a very light sand tint
Headlines	Deep Burgundy or Charcoal; generous spacing
Primary button	Nashik Onion Red with ivory text; darker burgundy hover
Secondary button	Transparent with burgundy border and text
Cards	White or ivory, thin sand border, low shadow, 12-16 px radius
Quality indicators	Muted Olive icons or labels; never neon green
Trust accents	Soft Gold rules and small highlights; never large gold panels
Forms	White fields, charcoal labels, burgundy focus state, clear validation

Typography and imagery

Use an elegant serif for cinematic headlines and a modern sans-serif for body copy, forms and tables. Photography should show natural texture, realistic crop condition and real operational context. Every image must be original, licensed or properly sourced.

PART VII - WEBSITE

Complete Conversion-Led Page Structure

The website must offer immediate domestic or export routing, answer commercial objections and repeat the correct CTA at decision points without making the page feel crowded.

Hero copy

DOMESTIC SUPPLY | INTERNATIONAL EXPORT

Nashik Onions, Supplied to Your Specification

India Trade Overseas coordinates bulk Nashik red onion sourcing, grading, packaging, inspection, documentation and delivery for domestic and international B2B buyers.

Primary CTA: Request Today's Quotation | Secondary CTA: Discuss Bulk Requirement

Trust line

Buyer-Defined Grades | Flexible Packaging | Documented Loading | Logistics Coordination

Market split

Domestic Supply	International Export
Bulk truckload supply for wholesalers, distributors, processors, institutional buyers and retail-chain suppliers across India.	Container-based supply for verified importers, wholesalers, distributors and food-service companies.
CTA: Get Domestic Delivered Rate	CTA: Request Export SCO

Core value section

One Point of Coordination from Nashik to Destination

Bulk onion procurement involves more than finding a market rate. Size consistency, crop condition, packing strength, bag weight, loading, documentation and transit planning can directly affect the buyer's outcome. India Trade Overseas coordinates these stages under one structured order process.

PART VII - WEBSITE

Product, Market and Trust Sections

Select the Grade Your Market Requires

Commercial Grade	Standard Export Grade	Premium Export Grade
For price-sensitive domestic trading, processing and approved bulk requirements.	For international wholesale distribution requiring suitable sorting, packing and documentation.	For buyers requiring tighter size consistency and enhanced visible-quality selection.

Packaging for Domestic and Export Markets

Domestic: 20 KG, 25 KG, 40 KG and 50 KG mesh or jute bags. Export: 5 KG, 8 KG, 9 KG, 10 KG, 20 KG and 25 KG ventilated mesh bags. Private labels and custom markings may be arranged for eligible quantities.

Domestic section

India Trade Overseas supports wholesalers, distributors, processors, retail suppliers and institutional buyers requiring truckload quantities of Nashik onions. Quotations may be prepared on an Ex-Warehouse, FOR or delivered-to-destination basis.

CTA: Get Domestic Delivered Rate

International section

Every export requirement is assessed against destination regulations, transit time, crop condition, packaging, buyer specifications and the selected Incoterm. Eligible orders are coordinated from product preparation and container loading to documentation and shipment updates.

CTA: Request Export SCO

Transparency section

Before final confirmation, India Trade Overseas establishes origin, crop, grade, size, tolerance, packaging, quantity, destination, inspection, delivery term, documents, payment, validity and dispatch window.

PART VII - WEBSITE

Process, Long-Term Supply and Final Conversion

A Clear Process from Enquiry to Delivery

01	Submit requirement
02	Complete buyer verification
03	Confirm size, grade and packing
04	Check lot and logistics availability
05	Receive formal quotation
06	Confirm Purchase Order and payment
07	Begin procurement and grading
08	Complete inspection and packing
09	Load and document dispatch
10	Track delivery and plan repeat supply

Long-term supply programme

Qualified buyers requiring weekly, monthly or seasonal supply can request a structured programme covering volume forecasts, specifications, packing, delivery calendar, price review, documentation and performance review.

Market-price notice

Onion prices can change according to crop arrivals, quality, size, weather, demand, packaging, labour, transport, port charges, freight and government regulations. Every quotation carries a defined validity period. An enquiry does not lock price or confirm stock.

Final CTA

Share Your Requirement. Receive a Commercial Supply Plan.

Tell us the quantity, size, grade, packaging and destination. Our commercial team will check availability, logistics and applicable terms before preparing the offer.

Request Domestic Rate | Request Export SCO | Chat on WhatsApp

PART VII - WEBSITE

Buyer Questions and Objection Handling

Do you supply across India?

Yes. Supply may be coordinated according to quantity, destination, vehicle availability and agreed commercial terms.

Do you export Nashik onions?

Yes, subject to Indian export policy, destination requirements, product availability, logistics and mutually accepted payment terms.

What is the minimum order?

It depends on destination, packing and delivery structure. Domestic transactions are generally commercial truckloads; export orders are generally container-based.

Can the buyer select size?

Yes. Requirements such as 25+, 35+, 40+, 45+, 50+ or 55+ mm may be considered according to lot availability.

Can the buyer inspect before dispatch?

Yes. A buyer representative or approved third party may inspect when mutually agreed in advance.

Can loading evidence be shared?

Photographs, videos, bag counts, sample-weight checks and seal details may be shared according to the confirmed process.

Are CIF quotations available?

EXW, FCA, FOB, CFR and CIF may be considered according to transaction and destination feasibility.

Can shelf life be guaranteed?

No universal shelf life should be guaranteed because performance depends on crop, curing, handling, storage, humidity and transit.

Can an annual fixed price be offered?

Recurring supply can be discussed, but a market-linked agricultural product normally requires a defined price-review mechanism.

PART VIII - CONVERSION SYSTEM

Smart RFQ and Buyer Qualification

The form must be short enough to begin, but detailed enough to prevent unusable enquiries. Use a four-step mobile-friendly form with progress indication and save-in-progress behavior.

Step	Required Fields
1. Buyer	Name, designation, company, country, city, mobile, WhatsApp, official email, website, buyer type and applicable registration
2. Product	Market, crop, grade, size, tolerance, quantity, monthly volume, packing, private label and required date
3. Delivery	City or destination port, Incoterm, transport, inspection and document requirements
4. Commercial	Target price optional, currency, payment method, PO readiness, trial or recurring requirement, notes and upload

Form confirmation

Thank you for submitting your Nashik Onion requirement. Our commercial team will verify the specification, current availability, logistics and pricing before issuing a formal offer. Submission does not constitute order acceptance or price confirmation.

Lead classification

Class	Definition
Hot	Verified company, complete requirement, destination, near-term purchase, acceptable payment and PO readiness
Warm	Genuine business requirement within 31-90 days; specification or internal approval incomplete
Cold	Unverified identity, no quantity or timeline, casual rate enquiry or unrealistic terms

Lead-scoring model

Factor	Points
Verified company	20
Complete requirement	20
Confirmed quantity	15
Purchase timeline	15
Payment readiness	15
Destination clarity	10
PO readiness	5

Hot: 75-100 | Warm: 45-74 | Cold: below 45

PART VIII - SALES OPERATIONS

CRM Pipeline and Automation

CRM stages

01. New enquiry	02. Verification pending	03. Buyer contacted
04. Requirement qualified	05. Specification confirmed	06. Quotation preparation
07. Quotation submitted	08. Negotiation	09. Sample or inspection
10. Purchase Order awaited	11. Proforma Invoice issued	12. Payment security pending
13. Procurement started	14. Sorting and packing	15. Inspection completed
16. Dispatch planned	17. Dispatched	18. Delivered
19. Repeat-order follow-up	20. Closed won	21. Closed lost

Mandatory CRM fields

Lead owner, source, buyer category, grade, quantity, destination, expected order date, last contact, next follow-up, quotation value, payment status, PO status, call recording, documents, internal notes and lost reason.

Automated WhatsApp acknowledgement

Welcome to India Trade Overseas. Thank you for contacting us regarding Nashik onions. Please share whether the requirement is domestic or international, your company, quantity, size, grade, packaging, destination, required date, preferred trade term and payment method. Our team will verify current availability, logistics and pricing before sharing the applicable offer.

Internal response standard

- Create the CRM lead immediately after a valid submission.
- Notify the assigned salesperson with all captured fields and attribution.
- Acknowledge the buyer automatically without promising price or availability.
- Set a next-action date on every open lead.
- Escalate hot leads and overdue commercial commitments.

PART IX - DISCOVERABILITY

SEO and Content Architecture

Recommended metadata

Element	Recommendation
SEO title	Nashik Onion Supplier & Exporter from India India Trade Overseas
Meta description	India Trade Overseas supplies bulk Nashik red onions for domestic and international buyers with custom grading, packaging, inspection, documentation and logistics coordination.
Primary URL	www.indiatradeoverseas.com/nashik-onion
Schema	Organization, Product, Service, FAQ, Breadcrumb and ContactPoint

Keyword direction

Nashik onion supplier; Nashik red onion exporter; onion exporter from India; bulk onion supplier India; Nashik onion wholesale supplier; fresh red onion exporter; Nashik onion container supplier; bulk onion delivered rate; Indian onion export company.

Supporting content

- /nashik-onion/domestic-supply
- /nashik-onion/international-export
- /nashik-onion/specifications
- /nashik-onion/packaging
- /nashik-onion/quality-process
- /nashik-onion/request-quote

SEO quality rule

Do not create thin, duplicate pages for every city or country. A destination page should only be published when it contains genuinely unique buyer, documentation, transit and logistics information.

PART IX - MEASUREMENT

Analytics and Lead Attribution

Events to track

- Page view, scroll depth and returning visitor.
- Domestic or international market selection.
- Grade, specification, packaging and quality-section views.
- Domestic rate, export SCO, WhatsApp, call and email clicks.
- RFQ started, each step completed, abandonment and submission.
- Document upload, qualified lead, quotation, PO, PI, order and repeat order.

Required attribution

Store first-touch source, last-touch source, campaign, ad set, advertisement, keyword, landing page, UTM values, first visit date, conversion date, device, country and returning-visitor status in the CRM.

Tracking stack

Layer	Purpose
Google Tag Manager	Controlled implementation and versioning of events
GA4	Page, funnel and campaign measurement
Meta Pixel	Browser-side advertising events
Conversions API	Server-side event resilience and improved matching
First-party session	Persist UTM and source data through the enquiry journey
CRM	Connect lead source to quotation, PO and revenue outcome

PART IX - TECHNOLOGY

Performance, Security and Accessibility

Performance

- Mobile-first responsive development and fast initial rendering.
- WebP or AVIF images, responsive sizes and lazy loading below the fold.
- Minimal scripts, optimized fonts and stable layout.
- Forms tested on low-speed mobile connections.

Security

- HTTPS, server-side validation, spam protection and rate limiting.
- Restricted file types, upload-size limits and malware scanning.
- Role-based CRM access, audit logs, secure credential storage and backups.
- Privacy notice, cookie controls and consent records where required.

Accessibility

- Readable contrast, alt text, keyboard navigation and visible focus states.
- Proper labels, clear validation errors and sufficiently large touch targets.
- Captions for important videos and no colour-only status communication.

Trust controls

Display legal name, business status, offices, GST, IEC, APEDA or other registration, memberships, shipment records and testimonials only after verification. Mask sensitive details in public document samples.

PART X - GOVERNANCE

Commercial and Legal Safeguards

All website information is indicative and intended for preliminary B2B discussion. Final quality, tolerance, quantity, packaging, price, payment, delivery term, dispatch schedule and documentation are governed only by the mutually accepted quotation, SCO, Proforma Invoice, Purchase Order, contract or written confirmation.

International supply remains subject to

- Prevailing Government of India policy and customs requirements.
- Phytosanitary and destination-country import rules.
- Banking, KYC and payment-security compliance.
- Shipping-line acceptance, container and vessel availability.
- Port operations, document timelines and force majeure.

Prohibited claims

- Guaranteed universal shelf life or zero defects.
- Permanent prices or stock reservation without written confirmation.
- Guaranteed dispatch or vessel dates before operational confirmation.
- Unverified certificates, shipment counts, customer logos or testimonials.
- A fixed container payload before confirming operational limits.

PART X - DELIVERY

Implementation Plan

Phase	Deliverables
1. Commercial approval	Specifications, grades, packaging, market model, RFQ fields and verified credentials
2. Design	Desktop and mobile wireframes, cinematic hero, product tables, process and RFQ journey
3. Development	Responsive build, forms, CRM, WhatsApp, analytics, SEO, schema and spam protection
4. Quality assurance	Device, form, CRM, messaging, analytics, speed, security, accessibility and copy testing
5. Launch	Publication, indexing, campaign activation, real-lead testing and conversion review

Launch acceptance criteria

- Domestic and export journeys are clearly separated.
- Every CTA, form, file upload, WhatsApp and call action works.
- Every valid submission reaches the CRM with lead attribution.
- Internal and buyer notifications are delivered correctly.
- Mobile layout, tables, forms and error messages are usable.
- Analytics and conversion events are verified in test mode.
- No false claim, broken link, exposed credential or missing disclaimer remains.
- Page speed, security, privacy and spam controls pass final review.

PART X - PERFORMANCE

Success KPIs and Management Dashboard

Area	KPIs
Website	Engagement, CTA rate, RFQ start, RFQ completion, abandonment, WhatsApp conversion and mobile conversion
Lead quality	Verified enquiries, hot leads, complete specifications and valid buyer identities
Sales	SCOs, quotations, POs, order conversion, average quantity, response time and repeat orders
Operations	Procurement time, packing time, dispatch delay, weight variance, claim rate and document errors
Learning	Best market, most requested size, best packaging, highest-converting campaign and lost reasons

Management principle

Traffic is not the primary success measure. The DPR succeeds when the company can trace a verified buyer from campaign source through qualification, quotation, Purchase Order, delivery and repeat business.

Recommended first 30-day review

- Review form abandonment by step and device.
- Compare domestic and export lead quality separately.
- Audit response time and next-action compliance.
- Identify campaigns producing quotations rather than clicks alone.
- Revise weak copy or fields only after evidence from real user behavior.

FINAL APPROVAL

Approved Brand and Conversion Direction

FINAL HERO

Nashik Onions for Domestic and Global Markets

Sourced with Precision. Graded to Specification. Delivered with Coordination.

Bulk Nashik red onion supply supported by customized grading, flexible packaging, quality inspection, commercial documentation and logistics coordination.
